Dual Check T-Connector

- Bulkhead-mounted unit used on two tank installations.
- Complies with UL and NFPA Pamphlet #58 specification.
- Check valves stop the flow of LP gas between two tanks, helping to prevent overfills.
- Should two tank pressures become unequal, this connector will draw LP gas from the tank with the higher pressure until both tanks equalize in pressure.

DORMONT® Residential Connectors – Indoor and Outdoor

Dormont® Stainless Steel 15 PSIG LP-Gas Connectors

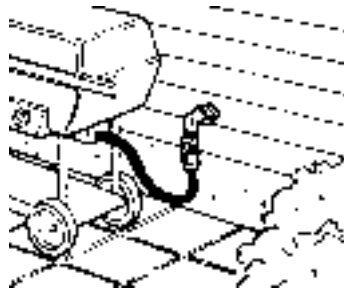

LP-Gas connectors designed specifically for outdoor use (NOT FOR USE WITH NATURAL GAS), the Supr-Safe connector gives you an alternative to typical copper or polyethylene connections, made for riser-to-regulator or tank-to-home connections. With a maximum rating of 15 PSIG, Dormont LP-Gas Connectors deliver superior performance and safety over typical copper tubing. Dormont LP-Gas Connectors come in standard lengths.

Fuel Gas Outlet Connection

Indoor and Outdoor Installation

When the manual valve is in the closed (OFF) position, to make a connection the user simply pushes back the locking sleeve, inserts the appliance connector plug and releases the sleeve. No tools are required for a leak tight connection.

Capacity: 42,000BTU/Hr. Temperature protected—prevents gas flow if connection is exposed to temperatures in excess of 200°F.
